

## EcoHero

# Match the Words to What They Mean!

### Reduce

Don't throw stuff out after you've used it, use it again! Take old plastic bags with you to the shops instead of getting new ones.

### Reuse

Coal, oil or gas. When burned these produce greenhouse gases.

### Recycle

Gases that trap heat in the air and cause global warming.

### Greenhouse Gases

Use less stuff! If you don't eat all your dinner then why not cook less food? Everything that you have or use has a carbon footprint, so only use what you need!

### Fossil Fuels

Energy from resources that will always be there emissions e.g. wind and solar energy.

### Renewable Energy

When something has broken or can't be used any more. Recycle any materials that can be, so they can be used in other things.

### Global Warming

The heating of the Earth caused by humans.
