

# Environmental Policy

**Version 8.3**

Last reviewed 7<sup>th</sup> May 2026

## Our Vision

To be a global leader in environmental change by empowering businesses and organisations to achieve Net Zero. We do this by providing industry-leading carbon management software and expert consultancy to drive down greenhouse gas emissions, whilst minimising our own environmental footprint and maintaining the exceptional service our clients expect.

## Our Environmental Policy

Carbon Footprint Ltd provides software solutions, strategic advice, and project delivery to businesses across the globe, enabling them to transition to a low-carbon economy. We help clients implement robust strategies based on measuring, reducing, and mitigating greenhouse gas emissions in line with the latest climate science.

Carbon Footprint Ltd strives to instil environmental confidence within our clients by demonstrating efficient, sustainable, and transparent behaviour across our full range of products and services. To ensure this is achieved, an action plan is implemented throughout the company, driven by the Board of Directors and integrated into our daily operations.

A pragmatic, science-led environmental concern is at the heart of our values. We strive to perform to the highest environmental standards by enforcing internal policies regarding business travel, office energy use and resource consumption, always considering a life-cycle perspective.

Reducing our absolute greenhouse gas emissions is the primary environmental goal for the business. We are actively committed to achieving and maintaining the highest tiers of the Net Zero Standard. For any residual emissions that cannot yet be eliminated, we take full responsibility by financially contributing to verified, high-quality global climate action projects.

Our employees are actively engaged in peer-group learning and most hold memberships with professional bodies such as the Institute of Sustainability and Environmental Professionals (ISEP) (formally the Institute of Environmental Management and Assessment - IEMA) and the Energy Managers Association (EMA), with staff actively being supported in achieving Chartered Status. We ensure we remain ahead of upcoming environmental legislation through these networks and by closely monitoring updates from the Department for Energy Security and Net Zero (DESNZ) and other relevant authorities.

Carbon Footprint Ltd is fully committed to fulfilling all compliance obligations. We are dedicated to the protection of the environment, the prevention of pollution, and the continual improvement of our Integrated Management System (IMS) to enhance our overall environmental performance.

This environmental policy provides the framework for setting, monitoring, and reviewing our environmental objectives and targets to facilitate continuous reductions and sustainable growth.
