Quality Policy

Version 2.3

Last Reviewed 29 August 2023
Our Vision

To be a leading provider of sustainability solutions to businesses and other organisations, helping to reduce our customers’ environmental impact and increase their CSR credentials. This includes reducing greenhouse gas emissions and energy use, and providing wider business cost and sales benefits.

Quality Management Policy

Carbon Footprint Ltd provides a professional, independent and responsive service to meet customer’s carbon management, environmental and sustainability needs, and deliver real business value to them in doing so.

How we do this:

1. Employ qualified/trained staff and ensure they understand the customer’s specific requirements and expectations, and are familiar with current best practice in carbon management and sustainability.
3. Continue to strive to improve our systems & processes to provide customers with increased benefits and value to their organisation.
4. Provide a range of auditable carbon offsetting through a variety of projects to meet customers’ needs, many of which meet international standards including Gold Standard, Voluntary Carbon Standard (VCS) and the Quality Assurance Standard (QAS).

Carbon Footprint Ltd is fully committed to all compliance obligations, and continually monitors for upcoming legislation. Carbon Footprint Ltd has a commitment to continual monitoring and improvement in order to enhance their quality management process.

The main objective of our Quality Management System is to ensure that company provides customers with product and services which meet uniformly high quality and performance standards, as outlined in our company vision.

Carbon Footprint Ltd’s quality management policy provides a framework for the setting and reviewing of quality objectives and targets in order to maintain and improve our Quality Management System.

John Buckley (Managing Director, Carbon Footprint Ltd)
