

# Quality Policy

**Version 2.5**

Last Reviewed 7 May 2026

## Our Vision

To be a leading global provider of software and consultancy solutions that empower businesses and organisations to achieve Net Zero. We help our clients drastically reduce their environmental impact, ensure regulatory compliance, and build robust sustainability strategies, whilst delivering tangible commercial and operational value.

## Quality Management Policy

Carbon Footprint Ltd provides a professional, independent and responsive software and consultancy services to meet our customers' carbon management and sustainability needs and deliver real business value in their transition to a low-carbon economy.

### How we do this:

1. **Expert Personnel:** We employ highly qualified and trained staff, actively supporting their continuous professional development and pathways to Chartered Status. We ensure they intimately understand our customers' specific requirements and remain at the forefront of best practice in carbon management.
2. **Robust Technology:** We develop, maintain, and implement secure, user-centric software platforms to provide our clients with accurate, auditable, and scalable environmental data management.
3. **International Standards:** We strictly adhere to and guide our clients through leading international frameworks, including the WRI Greenhouse Gas Protocol, ISO 14064, ISO 14067 (Product Carbon Footprinting), ISO 14068-1 (Carbon Neutrality), the Net-Zero Standard, and the latest DESNZ reporting guidelines.
4. **High-Integrity Climate Action:** We provide access to rigorous, auditable carbon mitigation and high-durability removal projects to meet our customers' specific strategic needs. We ensure these projects are from ICVCM CCP eligible programmes, meeting the highest international standards, including the Gold Standard, Verra (VCS), Climate Action Reserve, and Puro Standard.
5. **Continuous Improvement:** We continuously strive to improve our internal systems, software, and consulting processes to provide customers with increasing efficiency, value, and strategic benefit to their organisations.

Carbon Footprint Ltd is fully committed to all compliance obligations and continually monitors for upcoming legislation. We hold a commitment to continual monitoring and improvement in order to enhance our Quality Management System (QMS).

The main objective of our QMS is to ensure that company provides customers with products, software and services which meet uniformly high quality and performance standards, as outlined in our company vision.

Carbon Footprint Ltd's quality management policy provides a framework for the setting, reviewing and tracking of objectives and targets in order to maintain and improve our QMS.
